INPEX runs a booth at World Future Energy Summit 2010, Abu Dhabi

INPEX had a major presence at the World Future Energy Summit 2010 held in Abu Dhabi, UAE, from 18 to 21 January 2010. More than 23,000 attendees from 130 countries in Europe, the Americas, Asia, Africa, Australasia and the Middle East attended the event.

The INPEX stand, which was located in the Japan national pavilion hosted by the Japan External Trade Organization (JETRO), attracted many delegates. INPEX exhibited its oil and natural gas exploration and production activities in Abu Dhabi, as well as the model of high-capacity lithium-ion batteries developed by ELIYY Power Co., Ltd. (ELIYY Power), in which INPEX has invested.

INPEX is a worldwide oil and natural gas exploration and production company currently involved in more than 70 projects in 26 countries. INPEX, through wholly-owned subsidiary Japan Oil Development Co., Ltd. (JODCO), owns an interest in the ADMA block located offshore Abu Dhabi, from which it currently produces crude oil steadily from five oil fields. Following its investment in ELIYY Power in April 2009 and in DB Masdar Clean Tech Fund, L.P. in January 2010, INPEX has been continuously pursuing business opportunities in renewable energy-related areas as well.
