Policy and Commitments on Water Management

Our Policy

We strive to understand the impact of our business on water resources and sustainability in local communities and promote efforts on impact mitigation and value creation on local water sustainability.

Commitments

1. Identify water-related risks in areas around operational sites

- ✓ We strive to understand the water-related risks at operating sites using international risk assessment tools.
- ✓ We will develop and implement additional measures based on mitigation hierarchy^{*1} for areas evaluated as high water-related risk areas.

2. Restrict freshwater intake in high water stress^{*2} areas

- ✓ We will limit freshwater intake where significant impact is expected on local water resources as a result of freshwater intake by our operating sites.

3. Implement appropriate water management (water intake, usage, and drainage)

- ✓ We will strive to understand the status of water usage (water intake, drainage, usage) at our operating sites and promote 3R (reuse, reduce, recycle).
- ✓ We will implement appropriate treatment and wastewater management for produced water and other associated wastewater.

4. Collaborate with stakeholders

- ✓ We will collaborate with stakeholders to promote sustainable use of local water resources.

*1 Order of priority to avoid, reduce or minimize development impacts and then taking compensatory measures for remaining impacts.

*2 A state of inconvenience in daily life caused by lack of water.
